Overall length: 210 mm / 8.27"

Blade length: 88mm / 3.5"

Blade thickness: 3.1 mm / 0.12"

Weight: 110 g / 3.88oz

Blade: 154CM (58~60 HRC)

Finish: Bead blast

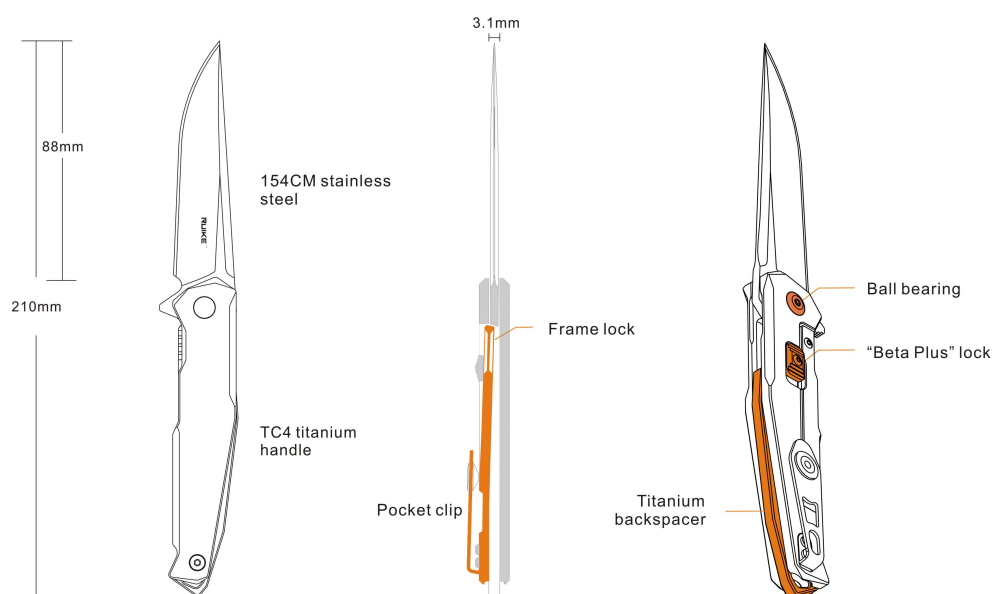

Handle: TC4 (titanium)

Frame lock + "Beta Plus" safety lock

Manual opening

Ball bearing washer

FEATURES

154CM Stainless Steel, [Cryogenic Treatment](#)

154CM is a premium stainless steel famous for its all-round qualities: good balance of corrosion resistance, toughness and edge retention. The 154CM blade is intensively processed by RUIKE using cryogenic treatment, and finally takes on a hardness of 58~60 HRC.

Titanium Handle

Utilizing titanium as the main handle material contributes a lot to shedding ounces, keeping rust away and offering high reliability.

"Beta Plus" Safety Lock

- 1) Avoids accidental blade closure;
- 2) Prevents lockbar overtravelling;
- 3) Patented, proprietary technology.

Thrust Ball Bearing/ Ball Bearing Washer

The built-in lubricated balls are made of specialized high-carbon chromium bearing steel and are finely machined. The balls feature excellent hardness, wear resistance and fatigue durability.
